

CRISP™

It does inventory.

It reorders.

....even weighed items.

It does “frequent shopper.”

It monitors cashiers.

....and reconciles tender.

It tracks vendors.

....and reconciles payments.

It does electronic products.

It schedules price changes.

And because it does it in realtime,
it does it all better than any other
point-of-sale system.

Starting at \$7,500
